

Ten Plagues by Greg Pliska

Each of the Ten Plagues – blood, frogs, fleas, flies, pestilence*, boils, storm, locusts, darkness, first-born – is represented below by three different images. Your job is to cross out each plague-related image and then cross out the letter in the corresponding box in the grid on page two. The left-over letters, from left to right, will tell you what the goal of all this is.

*specifically, diseases of livestock

E	O	R	A	U	E
